Forecast for Thursday 26 May 2022

Weather: Clear spells and only a few isolated light showers overnight. A day of sunshine and showers with outbreaks few and far between through to mid-morning, turning more frequent from later morning, potentially heavy at times bringing the small risk of thunder for the afternoon, chiefly across northern ranges, also wintry across highest peaks.

Chance of cloud-free hill tops above 800m: 90%+ for any given time, but little chance for prolonged periods later due to the increasingly showery nature of the flow.

Low Cloud and visibility: Good or very good, becoming moderate or poor in showers, very poor in wintry outbreaks across higher summits, also within cloud as bases sporadically lower 500-700m as showers push through.

Met Office Aberdeen Meteorologist's View

Cold in the strong summit winds, particularly later in the day when gales develop, bringing a severe chill effect. This combining with building showers, wintry at height, will bring some difficult conditions.

Forecast for Friday 27 May 2022

Weather: Another day of sunshine and showers, but improving with showers dwindling from mid-day, also winds lighter. Snow level around 900m lifting above summits for a time.

Maximum wind: West initially mean 35mph with gusts reaching 45-50mph over most exposed ridges and summits, gradually easing through the day.

Chance of cloud-free hill tops above 800m: 80-90% at first for any given time, but little chance for prolonged periods due to the showery nature of the flow. Improving through the day as showers dwindle.

Low Cloud and visibility: Good or very good, becoming moderate or poor in showers, very poor in wintry outbreaks across higher summits, also within cloud as bases sporadically lower 500-700m as showers push through.

Temperature: **Glens:** Plus 4 Celsius increasing 15 Celsius for the afternoon
At 800m: Plus 2 Celsius increasing 5 Celsius for a time
Freezing level: 1200m increasing 1500m for a time
